

Energy

We offer innovative systems thinking for tomorrow’s energy solutions.

In today’s dynamic energy sector, your ability to adapt and innovate is crucial. At Haley & Aldrich, we understand the complexities you face — from transitioning to cleaner energy and ensuring reliable service delivery to managing financial liabilities amid regulatory uncertainties. You need a collaborative, forward-thinking approach that enables you to meet your commitments while mitigating future risk and safeguarding your company’s reputation.

As your trusted energy consulting partner, we ask thoughtful questions and truly listen to develop a deep understanding of your business ecosystem. Our experienced energy consultants have built strong relationships with stakeholders and regulators. This insight fuels our ability to plan for the challenges you face, deliver breakthrough efficiencies, reduce costs, and proactively manage risks.

With leaders in environmental remediation, design, risk assessment, and facility siting and permitting, we use a systems-thinking approach that considers the interconnectedness of all aspects of your project to enhance overall performance and sustainability. Clients appreciate how our dedicated team seamlessly integrates with theirs, driving success in a business climate that is increasingly volatile, uncertain, complex, and ambiguous.

Market Leader, Energy

Energy consulting services to power your business

Clients consistently tell us that our ability to identify and remove obstacles and envision unique solutions sets us apart. They rely on us to support them throughout the full lifecycle of the energy ecosystem: from the initial planning and permitting of energy generation and transmission facilities to operational and maintenance compliance and efficiency to the management of environmental liabilities from contaminated sites.

Our energy consulting services span:

- Coal combustion residuals management
- Electric transmission and distribution
- Manufactured gas plants
- Nuclear plant decontamination and decommissioning
- Oil and gas transmission

- Renewable energy
- Thermal generation

Whether you're looking for support to transform power plants, improve grid reliability, or clean up the environment in the communities you serve, Haley & Aldrich applies in-depth industry expertise and a hands-on problem-solving approach that will help ensure you're reliably delivering services to your customers and maintaining your reputation.
