

Ann Arbor

A Haley & Aldrich hub in Michigan.

Assisting clients in the Midwest and beyond with geotechnical engineering and environmental services.

HALEY ALDRICH

Our Ann Arbor consultants focus on delivering contaminated site management and other services locally and beyond. Their expertise includes:

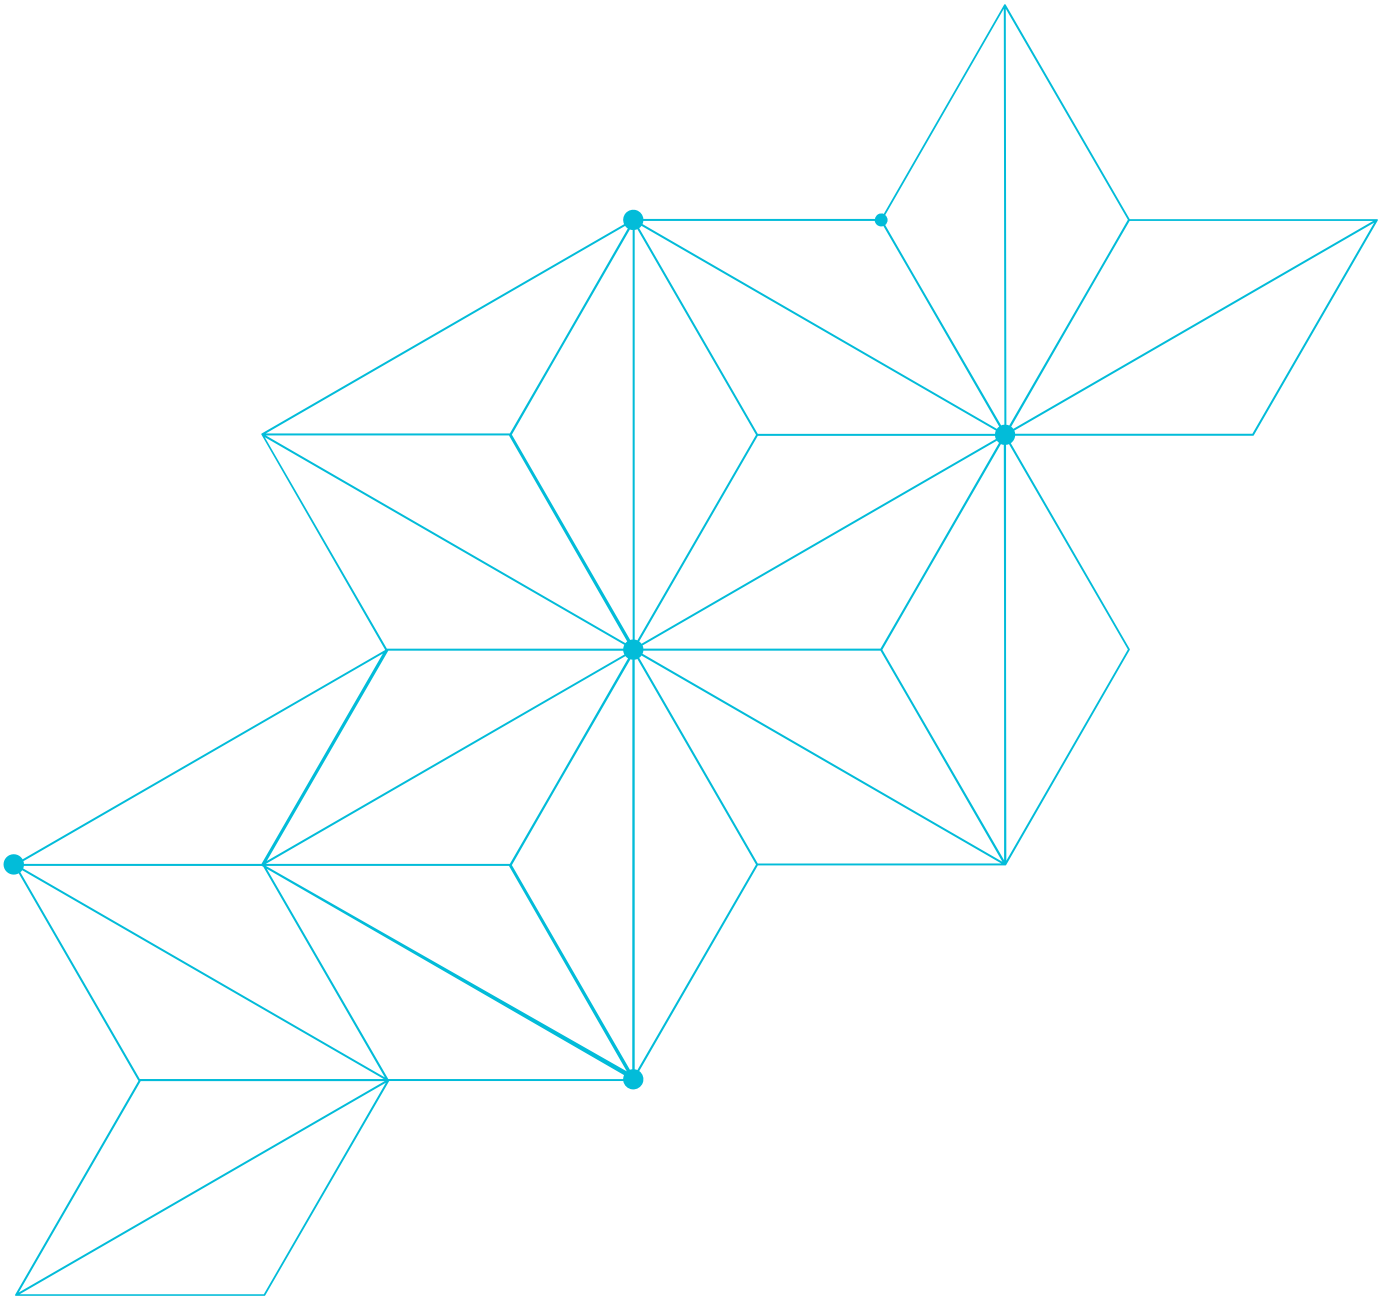

- Brownfields
- Construction
- Contaminated site management
- Disaster and climate resilience services
- EHS compliance
- Sustainability
- Geotechnical engineering
- Lean consulting
- Water resources

Construction, development, and environmental remediation projects across the Midwest come with unique challenges due to regulatory requirements and the region's diverse geological conditions. Haley & Aldrich offers specialized geotechnical engineering and environmental consulting in Ann Arbor, Michigan, and throughout the country. With decades of experience, our geotechnical engineers develop tailored solutions to address complex subsurface conditions, including expansive clay soils, glacial deposits, and groundwater management concerns. By combining geotechnical expertise with environmental services such as sustainability consulting and PFAS services, we provide integrated strategies that support sustainable development while also prioritizing compliance with evolving regulatory standards.

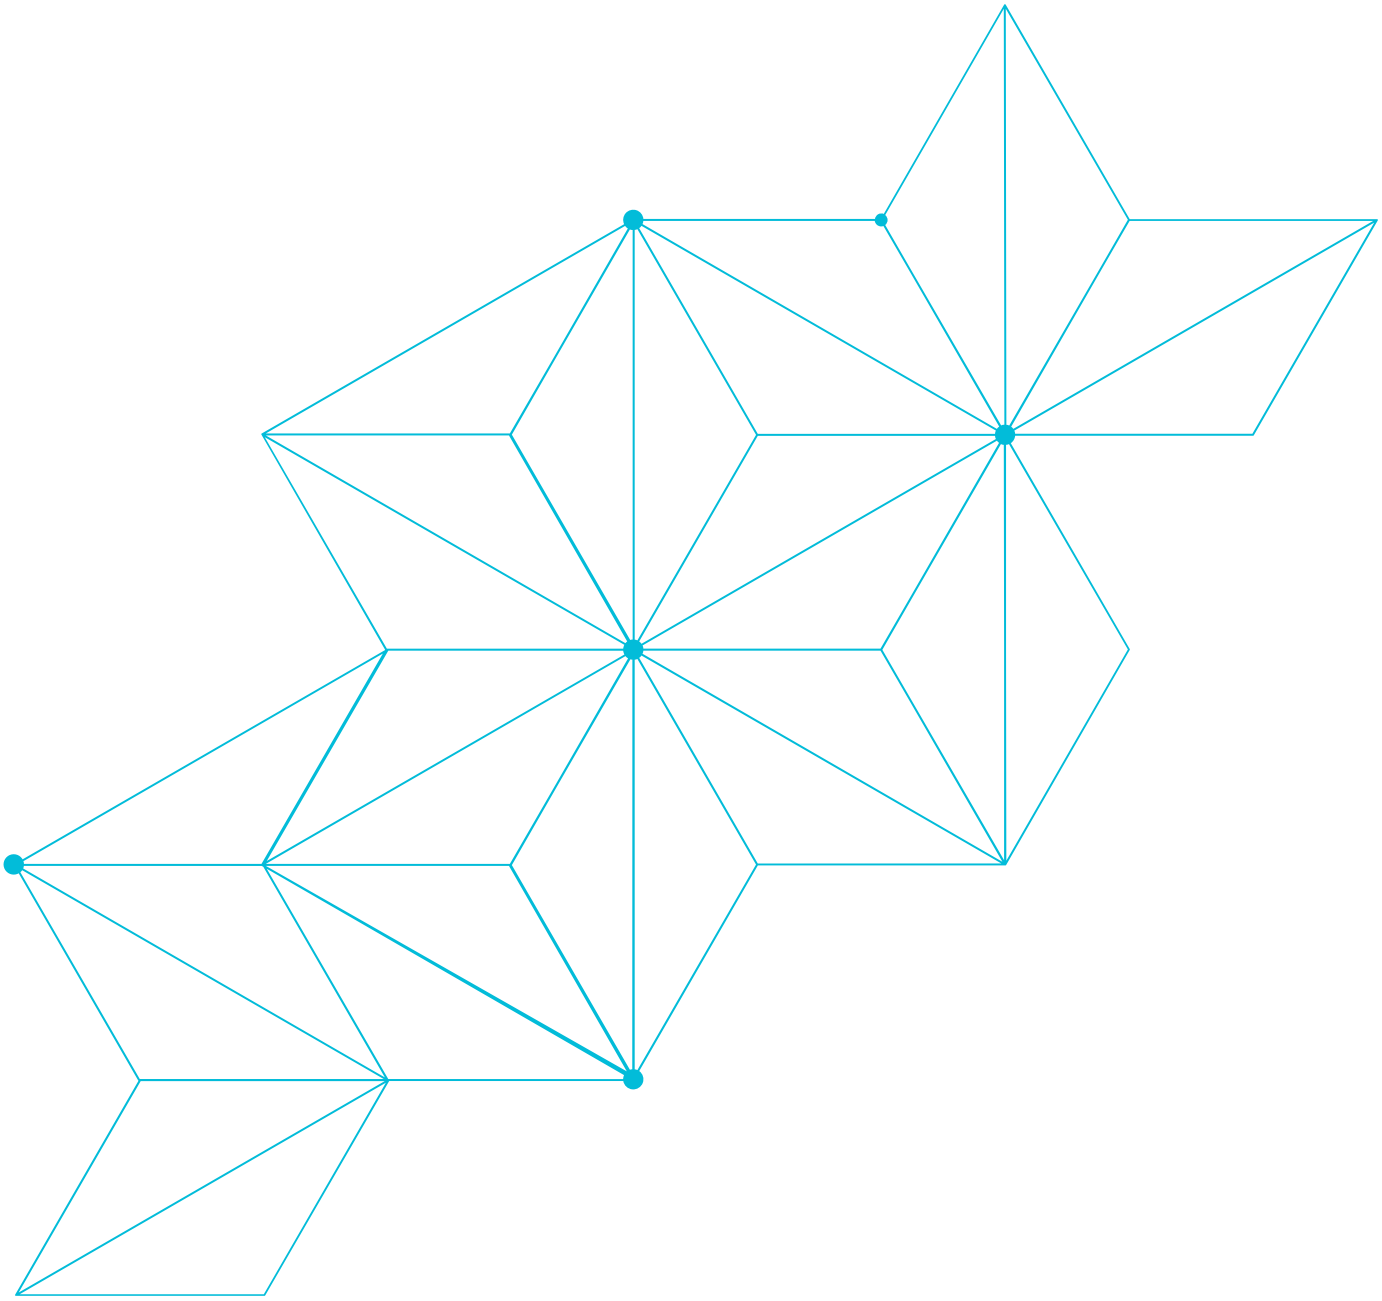

In addition to many other complex projects that benefit Michigan clients and the community, our team cleaned up a complex former manufactured gas plant site.
