

Boston

Bringing value to clients in New England and beyond.

Clients rely on our geotechnical engineering and environmental consulting.

Haley & Aldrich started in Boston in 1957, and over the following decades, our engineers and environmental consultants have guided much of the city's growth and development. We've shored up the [climate resilience of the](#)

[Seaport](#) and propelled skyline-changing projects like Boston University's [Center for Computing & Data Sciences](#). From our Boston headquarters, our consultants advise on projects that include:

- [Brownfields](#)
- [Construction](#)
- [Contaminated site management](#)
- [Disaster and climate resilience services](#)
- [EHS compliance](#)
- [Sustainability](#)
- [Geotechnical engineering](#)
- [Lean consulting](#)
- [Water resources](#)

Construction, development, and environmental projects throughout New England face distinct challenges due to regulatory requirements and the region's varied geological conditions. Haley & Aldrich provides specialized geotechnical engineering services and environmental consulting in Boston and throughout New England and the United States.

By integrating geotechnical expertise with environmental services such as ESG consulting and [PFAS services](#), we deliver comprehensive strategies that promote sustainable development with a focus on regulatory compliance.

We're proud of our deep roots in many Boston institutions and communities. Over the years, we've partnered with schools throughout the city on [STEM educational opportunities](#), and we've [given thousands of dollars](#) to Boston Children's Hospital and Spaulding Rehabilitation Hospital through our annual golf tournament.
