

Seattle

A Haley & Aldrich hub for Pacific Northwest clients.

Clients rely on our geotechnical engineering and environmental consulting.

Overlooking the Puget Sound, Haley & Aldrich's Seattle office provides a base for Haley & Aldrich consultants to partner with clients around the country. Among other services, we focus on:

- Brownfields
- Construction
- Contaminated site management
- Disaster and climate resilience services
- EHS compliance
- Sustainability
- Geotechnical engineering
- Lean consulting
- Water resources

In addition to many other projects in Seattle, we managed foundation design and monitoring for the city's Climate Pledge Arena, an <u>award-winning project</u> that built an enduring city landmark. The arena is only blocks from the office, as are many other businesses, restaurants, and local landmarks.

Haley & Aldrich 3131 Elliott Avenue, Suite 600 Seattle, WA 98121
