

## Vision and values

Haley & Aldrich's vision and values are our north star, guiding us through constantly evolving landscapes to stay true to our founding principles.

Together, we can build a stronger world as we navigate change.

At Haley & Aldrich, our **vision** is a world where communities see disruption as an opportunity to enhance safety, well-being, and quality of life – **going beyond resilience to become antifragile**.

**What does it mean to be antifragile?**

Every system, structure, and community falls somewhere along the spectrum from fragile to antifragile.

## Something **fragile**

breaks under stress

## Something **resilient**

resists and survives shock

and remains the same

## Something **antifragile**

improves and becomes stronger when exposed to volatility, stress, or disorder

Our **mission** is to **make antifragility a reality** by solving our clients' most meaningful challenges in the built and natural environments. Our work impacts lives as we guide communities through change — creating safer, more robust places to live and work.

Our **values** propel our vision and mission forward. These deeply held beliefs have been part of Haley & Aldrich since 1957, when our founders set out to create a technologically innovative company that would balance people, planet, and profit:

- **One team** makes us stronger.
- **Wise stewardship** today secures a thriving tomorrow.
- **Holistic well-being** is at the heart of who we are.
- **Continuous learning** sets us apart.
- **Challenges are opportunities** to learn and innovate.

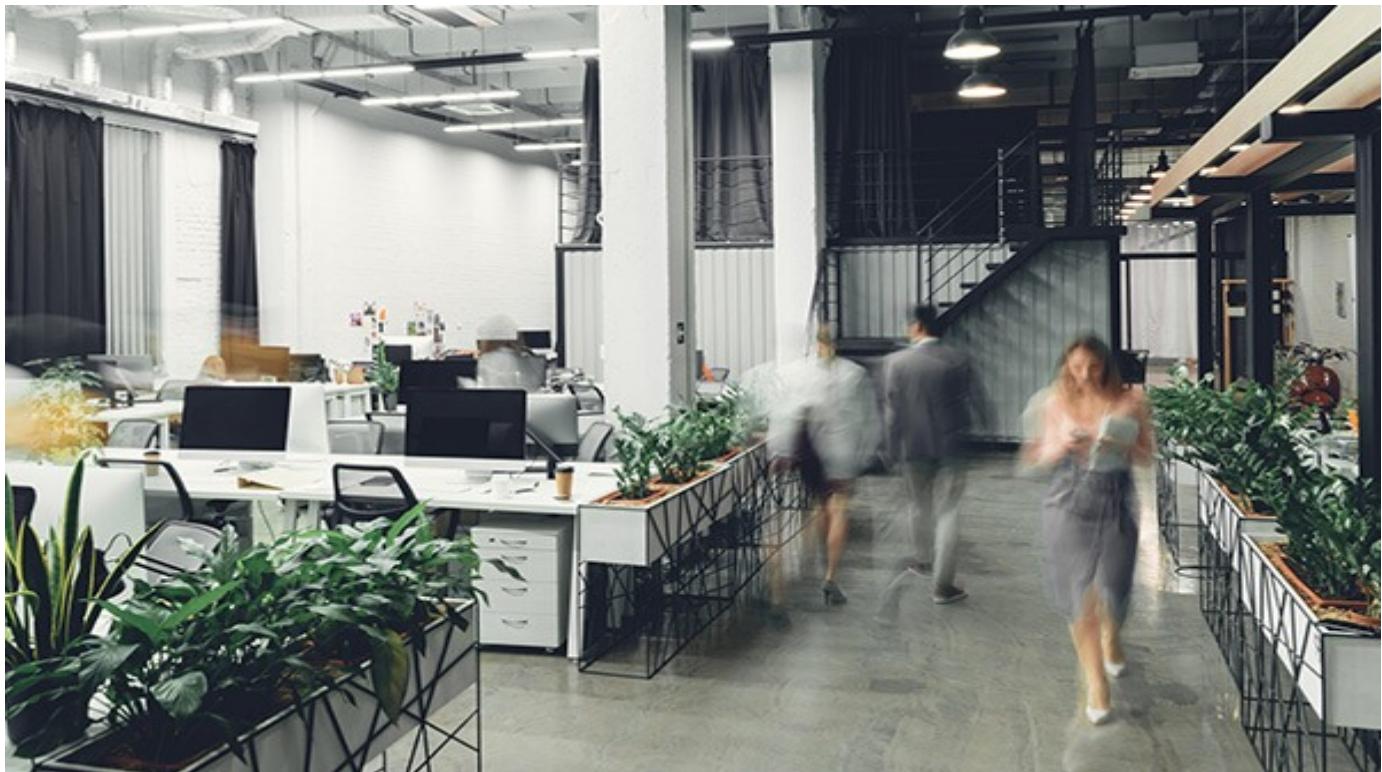

People are our greatest asset. Get to know the Haley & Aldrich team.

## Our sustainability approach

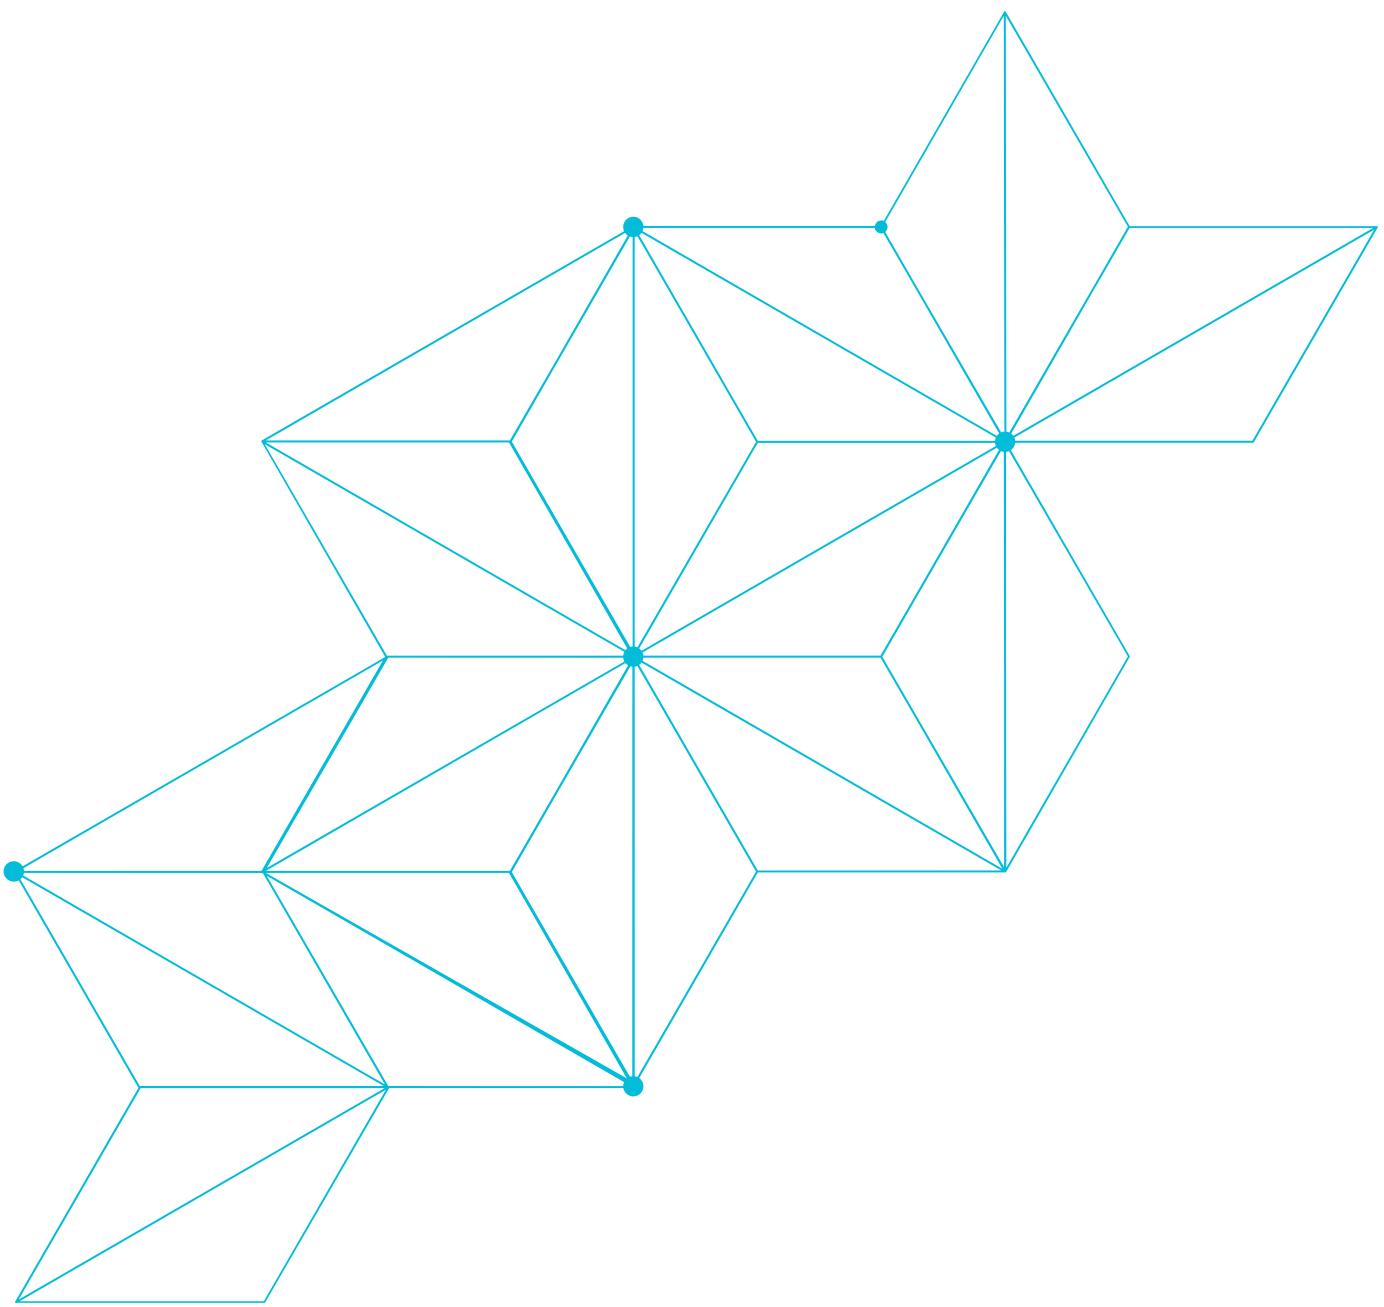

By integrating responsible stewardship, ethical governance, and social responsibility into how we operate, we strive to create long-term value for our people, clients, communities, and future generations. Haley & Aldrich's culture of continuous learning and technical excellence enables us to turn challenges into opportunities for positive impact.

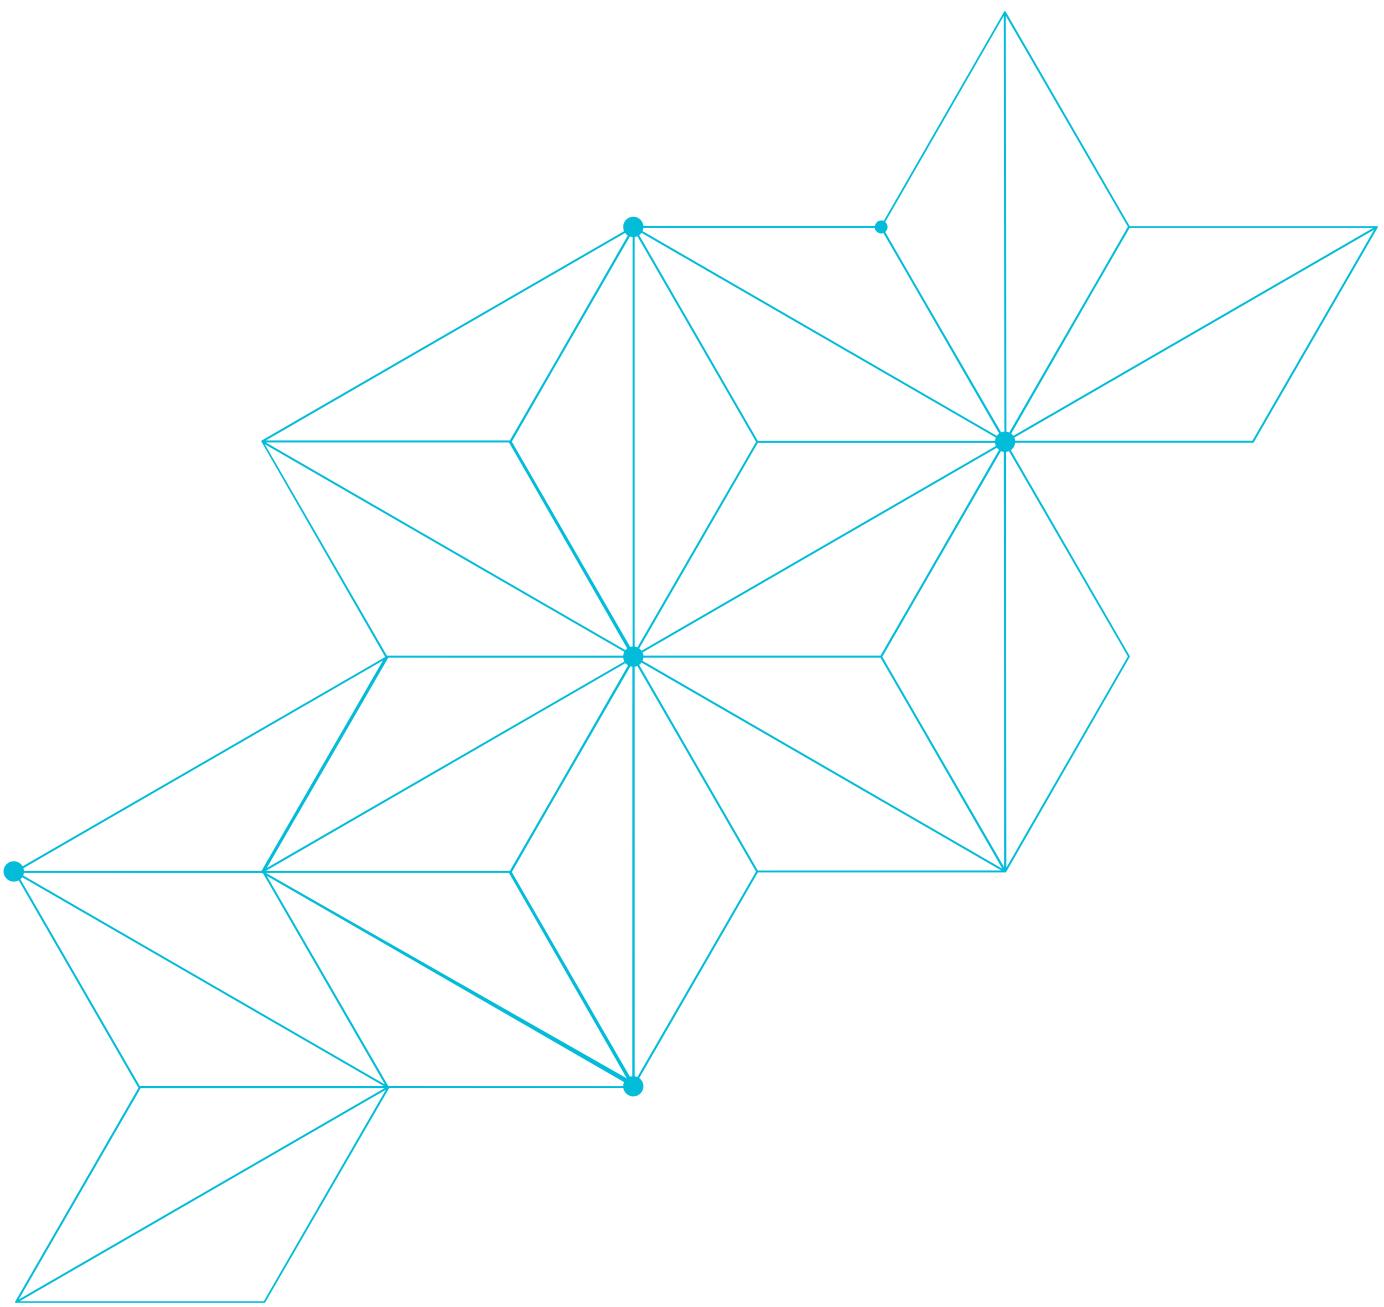

**Health and safety is at the core of everything we do.**
