Environmental and industry policy expert Dawn Santoianni to lead Haley & Aldrich's energy market–

Burlington, Mass., Jan. 27, 2025 – Haley & Aldrich is pleased to announce that [Dawn Santoianni](#) has been named energy market leader. In this role, Dawn will spearhead development of our strategy to expand our impact in the energy market during this period of transformation for the industry. -

Energy organizations rely on Haley & Aldrich for a broad range of environmental and engineering services that address business-critical challenges, including [sustainability and environmental justice strategy](#), [contaminated site remediation](#), and the siting and permitting of projects involving [renewables](#), battery storage, [advanced nuclear](#), and natural gas facilities. -

“Our energy clients face a rapidly evolving landscape, and Dawn’s leadership will be instrumental in reinforcing our position as a trusted partner in addressing legacy issues, developing new infrastructure, and tackling the complexities that challenge energy companies today,” said Haley & Aldrich Chief Client Officer [Lisa Turturro](#).–

Dawn brings more than 30 years of industry experience to her new role. She began her career as an engineer, founded a technical consulting firm, and has spent many years shaping environmental and energy policy strategy, including serving as energy policy director at one of the country’s largest [electric](#) and [gas](#) utilities. Dawn has also drawn on her policy expertise to testify before Congress, serve as a witness in state regulatory proceedings, and conduct regulatory impact analyses for a broad portfolio of clients. Throughout her career, she has led multistakeholder [environmental justice](#) and energy transition initiatives, honing her investor and public relations experience in the process.–

“Companies in the energy space must navigate evolving regulations as well as the needs of partners with diverse

viewpoints,” Dawn said. “While addressing existing environmental issues, they also need to invest billions of dollars in new infrastructure. Their challenges require an integrated approach to achieve resiliency, flexibility, and affordability.”-
