New faces in G-I: Brendan Cioto

Key takeaways:

- Haley & Aldrich geotechnical engineer Brendan Cioto reflects on his career path and projects in a recent *GEOSTRATA* profile.
- Brendan notes that he appreciates the variety in his work and the opportunities that have been available to him at Haley & Aldrich.

The Geo-Institute profiled Senior Project Manager Brendan Cioto in a recent issue of its member publication, *GEOSTRATA*. In the article, Brendan reflects on his career path as a geotechnical engineer and the large, complex public infrastructure projects he works on at Haley & Aldrich.

An active member of the American Society of Civil Engineers Geo-Institute, Brendan discusses the motivation behind his professional engagement. “One thing that keeps me excited about coming to work every day is the challenge of developing geotechnical solutions tailored to each project’s specific needs,” he says. “No two projects are the same, and that variety keeps the work interesting to me.”

Brendan also talks about the opportunities available to him at Haley & Aldrich, noting, “I think that choosing to stay at the same company has benefited me both personally and professionally.”
