PFAS need to know: how it affects real estate

Haley & Aldrich experts John Xiong and Sarah Mass teamed up with attorneys from Cox Castle's environmental group to present a webinar series on PFAS for the real estate industry.

In five webinars, John, Sarah, and Cox Castle's attorneys discussed the regulatory environment surroundingPFAS, also known as per- and polyfluoroalkyl substances, which are found at a variety of sites. These webinars aim to help property owners, land planners, and real estate developers understand PFAS due diligence, remediation options, liability, and other concerns.

Webinar 1: Why should the real estate community care about PFAS??

- What are PFAS?
- Where are PFAS used and found, and at what types of sites?
- If I have PFAS at a site, how easy are they to clean up?
- PFAS considerations and their potential to impact the entire life cycle for real estate

Webinar 2: The evolving PFAS regulatory landscape

- Recent regulatory changes that are driving much of the concern over PFAS
- The EPA's recent regulatory actions

- What is happening at the state level?

Webinar 3: Practical considerations regarding due diligence, sampling, and agency oversight

- Practical considerations as part of the real estate life cycle, including due diligence, sampling, and oversight
- High-level takeaways recommended for property buyers and/or sellers

Webinar 4: PFAS exposure pathways and remediation options

- PFAS exposure pathways and potential remediation options related to owner-occupancy requirements

Webinar 5: Evaluating PFAS and potential litigation issues
