Resilient linkages: the district

Published by:
Boston Living With Water

Authors:
Haley & Aldrich, Inc.; NBBJ; Ground Inc.; Charles River Watershed Association

Synopsis:
To address the challenges of higher tides and sea levels produced by climate change, Haley & Aldrich worked with co-authors to reimagine Boston's Fort Point Channel area around an aqueous central park. This innovative design proposes a dual-use water management system and recreation area in the heart of the city. Haley & Aldrich's project was awarded honorable mention in a competition among 50 teams.
