

Stormwater

Our team of innovative experts helps you weather any storm.

Meeting stormwater regulatory requirements can be a source of headaches. Confusing and constantly evolving compliance requirements that vary by state make it even more difficult to implement and maintain a consistent program. But given legislation like the Clean Water Act, failure to comply opens you up to not only potentially costly fines and penalties, but a hit to your public image.

The team at Haley & Aldrich understands that stormwater compliance is tangential to your core business, and you probably don't have the bandwidth to shoulder the burden. Our staff takes an innovative approach to stormwater management design in order to reduce that burden for you. For example, we offer flexible business models including pricing based on performance or a monthly fee to assume full responsibility for your stormwater compliance program. This allows you to prioritize your most important business needs while you trust us to navigate the compliance process.

Our stormwater management consultants also bring their innovative thinking to the technical solutions they design for your programs. We continually look for new ways to bring the highest value for your project – whether that's designing and constructing state-of-the-art stormwater treatment systems to meet ultra-low limits for consent decree

compliance, solving stormwater site design challenges on small footprint sites, or finding solutions for brownfields and sites with non-conforming land uses to incorporate low-impact development solutions.

Service highlights

- Clean Water Act litigation support
- Hydrologic and hydraulic modeling
- National Pollutant Discharge Elimination System (NPDES) permitting and compliance
- Stormwater construction and construction compliance
- Stormwater management and planning-
- Stormwater Pollution Prevention Plans (SWPPPs)
- Surface water and stormwater engineering
- Total Maximum Daily Load (TMDL) compliance
- Water quality testing and evaluation

Thoughtful, tailored stormwater solutions to exceed your expectations

More than meeting compliance requirements and permit deadlines, the team at Haley & Aldrich enjoys partnering with our clients to build trusted, long-term relationships. We understand that you have limited time, competing needs, and commitments that extend beyond the office. We work hard to put ourselves in your shoes – to understand what you value most, both inside and outside the workplace. This allows us to develop a deep understanding of your big picture goals and challenges – and achieve breakthrough results for you.

Our clients also tell us we're unique because we integrate Lean thinking into everything we do – leading us to continually check and adjust our approach. This results in micro and macro adjustments in our efforts and your stormwater management programs – reducing waste, creating efficiencies, and ultimately, more value.

We offer stormwater management consulting-services to the following markets:
